Public execution: candidate selection
Public task and submitted candidates
Public evaluation
Public operating state
Disrupted plan
Fixed commitments
Resource calendars
Objective priorities
Greedy G / local repair R3
Local candidate
Generative model
Model candidate
Parser
Formal verifier
Objective and event reconstruction
Comparator
Selected candidate
Output
Objective vector + events
Offline reference evaluation
Additional research information
Public reconstruction
Objective vector
Mission and resource events
Reference quality
Against optimized objective
Construct fidelity
Action-pattern diagnostic
Operating consequences
Service, timing, charging, energy
MILP reference
Construction annotations
Reference event trace
